

### KH-KIPPER half-pipe 1-way tipper body W1U

- 1 Greater volume and lower center of gravity ensured by unique  $\Omega$ -shape (omega shape) of body
- 2 Shape enabling optimal discharging of load
- 3 Rear wall with top hinges and automatic locking (hydraulically highlifted optional)
- 4 Front wall sloped to prevent against sticking of the load in the corners, easy demountable small roof
- 5 High pressure hydraulic system with new generation front cylinder ensures high speed of tip up and down
- 6 Rear underrun protection, foldable by means of springs (optional)
- 7 Lateral protection plates on sides to protect chassis components against falling load
- 8 HYFIX system locking the body on the subframe
- 9 Tarpaulin rolling system (optional)
- 10 Resistant aluminium mudguards for rear axles (optional)
- 11 Stabilizer between body and subframe for safety reasons
- 12 Steel grate protecting rear lamps
- 13 Body props, service support
- 14 Rear shovel on floor level
- 15 Rear wall opening limiter (optional)
- 16 Foldable ladder on the front left side
