

- Greater volume and lower center of gravity ensured by unique Ω-shape (omega shape) of body
- Shape enabling optimal discharging of load
- Rear wall with top hinges and automatic locking (hydraulically highlifted optional)
- Front wall sloped to prevent against sticking of the load in the corners, easy demountable small roof
- High pressure hydraulic system with new generation front cylinder ensures high speed of tip up and down
- Rear underrun protection, foldable by means of springs (optional)
- Lateral protection plates on sides to protect chassis components against falling load
- Tarpaulin rolling system (optional)
- Resistant aluminium mudguards for rear axles (optional)
- Stabilizer between body and subframe for safety reasons
- Steel grate protecting rear lamps
- Body props, service support
- Rear shovel on floor level
- Rear wall opening limiter (optional)
- Foldable ladder on the front left side
