

ROPS-FOPS is a solution that provides protection for mining truck operators in the most demanding conditions.

Combining innovative technology, durable materials, and superior safety features, **Pro-Shield** is an essential component of any mining fleet, increasing operational safety and efficiency.

The KH-KIPPER ROPS-FOPS structure was designed using high-quality materials resistant to mechanical damage, such as impacts or rollovers.

The Pro-Shield canopy is compatible with mining tippers, regardless of the make or model of the vehicle.

The **Pro-Shield** structure complies with international safety standards, ensuring full compliance with mining industry regulations worldwide (PN-EN ISO 3449:2009 i PN-EN ISO 3471:2009).
